**STRUCTURES**  
by yardworks

Quality is the foundation on which we build.

## Construction Specs

4 x 4 pressure-treated timbers form the runners: two for 6' wide buildings, three for 8' wide, and five for 10', 12' and 14' wide buildings.

Floor joists, wall studding and rafters are constructed using lumber spaced 16" on center. Floors are covered with 5/8" flooring. Walls are covered with your choice of either 1/2" sheathing and vinyl siding or 1/2" T1-11 siding. Roof trusses are designed to give maximum headroom over most of the floor area. The roof consists of 1/2" sheathing covered with architectural asphalt shingles.

## Our Quality Sheds

...are made for you by skilled workers using quality materials to give you a long-lasting structure with a minimal amount of maintenance.

...are sturdy and very well-built; ideal for storing garden tractors, lawn mowers, furniture, motorcycles, bikes, snowmobiles and even cars.

We also custom build two car garages.

If your building cannot be delivered fully assembled, we will build on-site at an additional cost.
