Star Quality Swingsets *Powered By Fun & Adventure*

For more than a decade, Star Quality Swingsets has been crafting vinyl playsets and bringing countless hours of enjoyment to children all across the nation. Our family-owned and operated business based in Lancaster County, PA is committed to creating safe and durable playsets for your children or grandchildren.

Studies show that playing outside is crucial to a child's healthy brain and body development. Outdoor play activates the frontal cortex which is responsible for controlling emotions and problem solving. The experience of playing forces the brain to make neurotransmitter connections that are essential to a child's development. The benefits that play has on the body are also undeniably fundamental. Increasing core muscles, refining small motor skills, and increased coordination are just a few ways that play is beneficial to a child's growing body. Additionally, it has been found that attention spans are increased, sensory skills are improved, and better immunity is built! At Star Quality Swingsets, our goal is to build fine quality, affordable playsets to help your child reap all those benefits.

Our playsets are carefully designed to fill all available space with activities that will expand your child's creativity and let the playset become anything they can imagine!

What are you waiting for? Shop our various playset series or get started crafting the playset of your child's dreams today!

We Can Deliver Your Playset!

Your swingset will be delivered partially assembled. All gate openings need to be as wide as the tower of your playset. There is a \$150 charge if we need to return because of inaccessibility.

Frequently Asked Questions

Q. Will the Vinyl Turn Yellowish with Time?

A. No. Here at Star Quality Swingsets we use only high quality vinyl that includes a highly effective UV resistant component specifically engineered to keep it from yellowing.

Q. How Hard is it to Maintain Your Playsets?

A. Star Quality Swingsets loves this question. We love the answer even more! Maintenance is almost unneeded. From time to time, as any outdoor toys do, it needs washed off. However, you don't need harsh cleaners. A hose, glass cleaner, and a soft bristle brush will do the trick!

Q. What Prep is Required Before Installation?

A. We recommend that the site be leveled before delivery, not only for appearance but also for safety. Prepare an area with at least six feet of space on each side of the playset. Not having a properly leveled area will void the warranty.

Q. How Strong is The Vinyl?

A. The vinyl we use has five times the tensile strength of wood and four times the flexibility of wood!

Q. Why Do You Cover the Wood?

A. By covering the wooden structural elements of the playset, it keeps the stability without the maintenance. No one wants to re-stain or re-paint a playset every year. Covering the wood eliminates splinters. It also preserves the wood, which makes our playsets last for many, many fun-filled years to come.

What is *Star Swingsets Quality?*

There are a few things that come to mind when it comes to quality. Here is what we mean when we say Star Swingsets Quality:

- **Safety Obsessed**

When you are looking for a playset for your child the last thing you want to worry about is safety. That's why at Star Quality Swingsets we focus on safety. No splinters, no exposed wood, and child friendly. Our rounded vinyl caps leave no dangerous sharp edges exposed. Non-skid grip tape provides added traction on steps when entering and exiting the tower. Smooth, slip resistant vinyl is the only thing your child needs to come in contact with. Some would say we're obsessed with safety, but this is for your child. Enough said!

- **Stronger than the Rest**

When you think of a typical playset you may not think along the lines of quality. However, a Star Quality Swingset means a playset that will last far longer than your typical, cheaply built, big box store playset. Our splinter-less vinyl encases wolmanized L3 lumber to ensure durability well into your child's teen years. Our premium canvas roof options compete with those used in commercial playgrounds. Our swing beam anchoring system adds extra stabilization to stop shifting during play.

- **Longer Lasting than the Best**

When it comes to durability, we believe in putting our money where our mouth is. That's why all of our playsets have a five year no quibble warranty. We believe in our product. That's why we guarantee you will too! See our warranty page for more details.

CLEANING & CARE

Over years of usage your playset may become dirty looking. To revitalize and clean its appearance use a soft bristled brush, warm water and glass cleaner to gently clean your playset.

With the safety of your child being our number one goal, we offer **vinyl construction** which ensures that there are no splinters or wood treatment chemicals exposed.

Our **soft grip chains** give little hands something comfortable to hold onto.

Double coated zinc chains ensures rust never forms.

By using **high-quality stainless steel fasteners**, we are able to keep rust away and your playset looking like new for years to come.

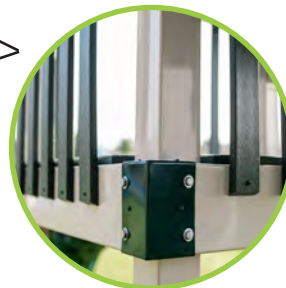

Our **poly decking** is the most safe and non-splintering for small hands and feet to play on.

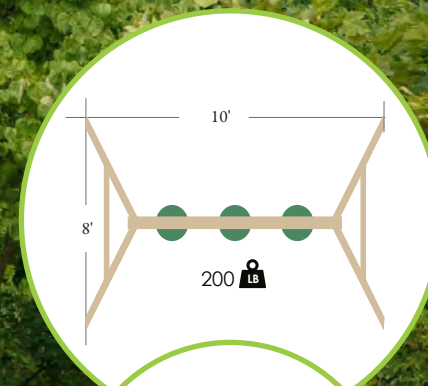

The **super heavy-duty slides** are made of thick molded vinyl. Each part of your playset has only the highest of quality materials.

Powder coated corner brackets ensure a rust free structure support.

All playsets are built with **pressure-treated wood and encased in a tough vinyl covering**. This will provide safety and beauty.

Warranty Information

STAR QUALITY SWINGSETS WARRANTY

Subject to ordinary residential use and proper installation by a certified Star Quality Swingsets installer, Star Quality Swingsets warrants to the original purchaser at the original installation address, that the structural components of the playground systems, such as the PVC plastic lumber and wood components, are covered by a 20-year warranty. In addition, all canopies, slides, metal components, swings, and accessories are warranted for five years from date of original purchase.

Effects of normal wear and tear, improper maintenance or abuse are not covered by this warranty. All damage resulting from acts of nature are not covered by this warranty.

Star Quality Swingsets reserves the right to request proof in the form of photos or physical evidence of defective product. Customer agrees to pay for all shipping or other costs involved in returning said defective product for inspection. Star Quality Swingsets will repair or replace the defective products at its own discretion. If this is deemed impractical, we will reimburse the original purchaser for the value of the defective piece.

All of the above expressed applies ONLY to sets that are installed by an authorized Star Quality Swingsets installer and used in a normal residential environment. We ALWAYS advise adult supervision while your child enjoys their play set. Please make sure your child is instructed to keep a safe distance from all moving equipment and parts.

RUBBER MULCH

Star Quality Swingsets' rubber mulch is highly durable and does not decompose, compact, or require annual top-up over its lifetime. Our processing methods have been perfected over the last 20+ years, yielding the cleanest, safest rubber mulch available today. It's no wonder our rubber mulch is the top choice of schools, public playgrounds and homeowners.

Finishing Touches

Engineered Wood Fiber (EWF)

Engineered wood fiber is a popular choice for projects with initial budget constraints. EWF does require ongoing raking and occasional topping off during its lifetime due to compaction and decomposition. This maintenance will help ensure the correct material depth of the playground wood fibers for compliance with safety and accessibility standards. Once the newly installed EWF has settled, it forms a “knitted” layer that is designed to support a variety of mobility devices including wheelchairs, crutches, and walkers.

Rubber Mulch Border - 6" H x 4' L

Tan

Gray

Geotextile Fabric - Weed Barrier

This barrier is the premium weed guard available for play sets. We offer it to our customers with every rubber mulch and EWF installation. It allows air and water to penetrate through to keep it worry-free of puddling, mudding and even weed growth on the playground.

	Rubber Mulch	Engineered Wood Fiber
COST-EFFECTIVE	●	○
EASY TO INSTALL	●	●
SAFETY-RATED UP TO 12 FT	●	○
DOESN'T REQUIRE ANNUAL TOP-UP	●	○
DOESN'T PROMOTE GROWTH OF MOLD & FUNGUS	●	○
DOESN'T ATTRACT ANIMALS & INSECTS	●	○
DOESN'T ABSORB WATER	●	○
DOESN'T DECOMPOSE	●	○
DOESN'T COMPACT	●	○
DOESN'T FREEZE & HARDEN	●	○

Things To Consider

Space For The Playset

It's very important to keep in mind the proper safety zone precautions. The industry standard is 6' of open space around the entire playset. This space ensures your child has enough room to run, swing and play safely.

Location

Since safety is the #1 priority, it is imperative to keep your playset out of range of any electrical wires, clotheslines and low lying tree branches. Consider installing your playset in clear sight of the house for easy parental supervision. Installing the playset in a shady spot in the yard can help avoid hot slides and minimize sunburns!

Many homeowner's associations have guidelines about how close your playset can be to your home, property lines, sheds and pools. Make sure you are familiar with their rules and regulations before purchase and installation.

Safety Surfacing

While rubber mulch is considered to be the safest option for underneath of the playset, it is not the only option. Playground surfacing falls into two categories. First, loose-fill materials such as engineered wood fiber, rubber mulch, sand and pea gravel. The second category is unitary surfacing. Unitary surfacing consists of poured rubber, grass and artificial grass or turf. Every playground has different needs so it is important to take into consideration budget, maintenance and who will be playing on the set. To learn more about the safety surfacing options available at Star Quality Swingsets, check out our 'Guide to Building Your Playset'.

Who Will Be Playing On The Playset

Consider age range when choosing the perfect playset for your family or organization. For babies and toddlers, ground level playhouses, baby swings, and bubble panels provide easy and fun entertainment. Some components that are fun for preschool age children and up are enclosed slides, belt swings and picnic tables. Some components require stronger motor skills and would be difficult for children under five such as rock walls and cargo nets. Children between the ages of five and eight should be able to balance, jump and engage in more challenging play. Adding items such as monkey bars, a trapeze and 14' slides keeps them learning and active. As your child grows, we recommend modifying your playset to their abilities. Switching out swings and adding fun items is an easy and cost efficient way to make sure your child is getting the most out of the playset.
